Town Council Holds Session Last Monday

Mayor and Full Council Were Present for Meeting

A quiet session of the town council was held last Monday evening with the Mayor and a full council present.

After disposing of the minutes Carl Wolters waded on council and pointed out that since he was held responsible for the payment of water furnished to Arlington he be allowed to have a tap of his own. He said the water was paid for by meter and under present system the taps were left running causing unnecessary expense for him. On motion of councillor Sangster and Hargrave Mr. Wolters was allowed to arrange for a tap on dead end for his own use, work to be done under the supervision of the town superintendent.

After some discussion on the Gas franchise renewal it was decided to leave the matter over till next meeting of council and that a representative of the gas company be asked to attend to discuss matters regarding the drawing up of the new franchise.

A letter was read from Mr. G. M. Blackstock asking council to make payment to Mrs. Van Wort of \$282 for injuries received from a fall on the sidewalk in town. As a later letter was received from Mr. Blackstock stating that Mrs. Van Wort was still ill and he wished to "withdraw previous request" the matter was left in abeyance.

On motion of councillors Shaw and Sangster two applications for direct relief were approved.

A letter was read from the supervisor of direct relief, in which attention was drawn to the fact that bills had been submitted, containing articles not allowed according to direct relief rules, and stating that merchants be notified to this effect as in future such accounts would not be approved for payment.

The usual monthly accounts were approved for payment. The secretary was instructed to notify the company which purchased the old ornamental iron works that the time for this agreement with the town had expired.

OLD COUNTRY IS COMING BACK STRONG

Great Britain again breathes the spirit of recovery. The financial clouds are lifting. The first phase of the crisis which drove her off the gold standard and wrecked the Labor government is now definitely past.

The old country is not only paying down on the nail; she is repaying the greater part of her American exchange credit before it is due. She has lifted exchange restrictions in a gesture which it is hoped will lead to a revival of international trade.

More attention to the development of export markets for farm products, particularly live cattle, bacon and butter, were represented to the agricultural committee of the legislature Friday morning as the main essentiality to getting Canadian farming on a practical basis.

Mrs. Wm. Henderson Passed Away Tuesday

Funeral Take Place From Gordon Memorial Today

Mrs. William Henderson passed quietly away at her home here last Tuesday afternoon, about four o'clock. Deceased, who was 83 years of age last day, had not been enjoying her usual good health for the past few months but had apparently been improving and had been able to get up and around again during the day for the past week. On Tuesday, however, she took a weak turn and as her heart had undergone a severe strain she can't rally.

Despite her advanced age Mrs. Henderson has been very active about her home until her last illness.

Deceased whose maiden name was Agnes Griener, was born at Saultmore, Ontario, on May 14, 1849. On February 18th, 1870, she was married to Mr. Henderson at Teeswater, Ont. and he, husband, who is in his 94th year, still survives to mourn the loss of a life long partner, who, despite the many vicissitudes through which they passed was ever at his side to share his joy and lend her advice and encouragement in times of disappointment and stress. Few at her age are blessed with such bright and cheerful disposition as hers and which enabled her to enjoy the company of her grandchildren and friends to the end.

Mrs. Henderson came to Redcliff with her husband in 1912 and has resided here ever since. Besides her husband deceased leaves two daughters and one son. These are Mrs. Wilson of Vancouver, Mrs. Clinton of Duluth, and William of Redcliff.

The funeral takes place this afternoon (Thursday) from Gordon Memorial church and the remains will be interred in Redcliff cemetery.

MANY NEW INDUSTRIES COMING TO CANADA

The list of new industries established in Canada since August, 1930, shows 142 manufacturing concerns have introduced their operations here. Of these 131 were from the United States, 10 from Great Britain and one from France.

This is said to be the result of government's new trade and tariff policies.

The formal opening of the upper portion of the new St. Patrick's Church in Medicine Hat took place this morning. A large congregation, including many from Redcliff, attended the ceremony.

Col. MacDonald of the headquarters staff, Calgary, was in town last Monday evening inspecting the armories here. He expressed himself as well pleased with conditions around the building.

Some night prowlers broke into the Review office last Monday night and borrowed our hot shot battery. So far they haven't returned it. The same night a tire was stolen off J. Bergeron's trailer. Evidently some one is trying to get a car put together by spring.

MR. AND MRS. Wm. HENDERSON who celebrated their 63rd wedding anniversary on February 18, last. Mrs. Henderson passed away on Tuesday afternoon of this week at the age of 83 years.

THE WEEK AT OTTAWA

The time of the House on Monday was taken up by a discussion on freight rates. The new unemployed came to present a petition to the government asking for a reduction in the export rate on wheat going to the Prairie Provinces to Vancouver or the West. On a car load of wheat going from Calgary to Vancouver for export, you pay 20c per 100 lbs. On a similar car load moving from Calgary to Vancouver for domestic use, you pay 41 1/2c per 100. The same car load can go from Calgary to Shanghai for 36 1/2 cents per 100 and all intervening charges are included. The policy man in China runs this get Alberta wheat cheaper than the policy man near Vancouver.

A somewhat similar state of affairs is found in the difference between domestic and export rates on wheat or any grain going to eastern ports. It is, of course, the policy to encourage export or foreign shipments.

The mills in Medicine Hat are interested in this problem. The export rate on wheat does not apply to wheat going from Vancouver to United States. Seattle must pay the domestic rate. If the rates were equal our hard wheat would go to Seattle for milling and we would be helping U. S. A. to build up strong competition against our Canadian flour. The by-products would also be available for American stock and not for Canadian. Even after considering these factors it is felt that the domestic rate is far too high and government promotion action.

During the rest of the week the Unemployment question was discussed. Monetary changes, shorter working hours, reduced wages increased tariffs and many other schemes were advanced. The Prime Minister has asked for a blank cheque and many of the members refused to consent to this. He has been called an Autocrat, a Dictator, a Mussolini and a Member from Labeled also compared a Sultan. Most of the discussion is carried on in good spirit but some members see in the resolution great danger if the Commons have the right to scrutinize and pass on money bills.

In better vein, the Ministers of the Government were ridiculed for their panic in calling out

Dominion D Footballers Organize for Season

Good Attendance and List of Officers Elected

The Diamond D football club met last Friday evening for the purpose of re-organizing for the coming season. There was a good attendance and all present were most enthusiastic in the business of the meeting.

The following officers were elected:

Honorary Presidents—Messrs. R. S. Hodge, R. Mackenzie, E. N. Badaue, Seltz, G. Ordway.

President—B. Moore.

Vice President—G. L. Davis.

Sec. Treas.—C. Newbould.

Ex Com.—Messrs F. Congrave, A. Collard, R. Schmidt, C. Evans, Ed McKinnon, and A. Osmond.

Caretaker of Equipment—S. Britt.

Trainer—F. Jones.

Ass't. Trainer—Jim Podesta.

Social Com.—T. Davies, G. Thomson, A. Klemm, E. Podesta.

Jim Podesta, G. Evans, W. Lawton, and R. Simpson.

SCHOOL NEWS

The High School Literary Society held its last meeting on Friday, March 11. The program opened with the reading of the last edition of the Literary Gazette, followed by dramatic competition. Each of the four literature classes presented a scene taken from their literature.

The first part of the program between Prince Arthur and Hubert selected from Shakespeare's "King John". Those taking part in this were: Elmer Congram, Eric Congram, George Kitchen and Raymond Dubaut.

Grade 10 presented a comedy scene from Shakespeare's "As You Like It". The performers from this grade were: John Soukup, Margaret Rutherford, Robert Buchholz, Mack Martin and Janet Paterson.

The winners of the competition were the grade 11 class, who gave a splendid presentation of Mr. Bumble's proposal to Mrs. Croney, taken from Dickens' "Oliver Twist". Annie Shaw, Jim Lowens and Jean Paterson took part.

The Grade 12 class dramatized a tragedy from Lytton's "Last of the Barons". Those who in this were: Irene Buchholz, Jean Moore and Dan Jensen. There were quite a few visitors to represent all of whom declared that both the presentation of the scenes, and the appropriateness of the costumes, could not have been much improved.

Issac Kitchen, of Calgary has been employed for the past two weeks doing some electric work at the glass plant. He is remaining over a few days to visit his parents here.

Four more dogs were taken to the pound on Wednesday and 17 on Thursday. An effort is being made to find the person who is stinging out the poison. We are understanding those who have lost their dogs have their sympathies, and some arrests are expected shortly.

Local Plays Booked For Empress Theatre

'The Valiant' & 'Mockbeggar' In Hat Easter Monday

Both "The Valiant" and "Mockbeggar" will be presented by local players in the Empress Theatre, Medicine Hat on Easter Monday, March 28th together with "The Second Lie" produced by Norman Davis. The latter play scored a great success at the recent dramatic festival held in Edmonton. Proceeds from the local players will go to St. Ambrose and Gordon Memorial Churches while the Medicine Hat Players will donate their share to the Milk Fund. It is expected that a large contingent from Redcliff will be down to support the home town play. The seat sale opens at Pingle's Drug Store on Tuesday, March 22nd. Redcliff patrons may reserve a block of seats by phoning Pingle's on Monday before the rush for seats. Medicine Hat. The price for orchestra seats is \$1.00 for orchestra seats. There will be only two rows of rush seats at the back for fifty cents.

Ladies' Aid Concert Friday, April 18th

L. A. Mamas to Make Their Debut on the Stage

A grand entertainment under the auspices of the Ladies' Aid will be given in Gordon Memorial school room on Friday, April 8th, commencing at 8 o'clock.

The first part of the program will be presented by members of the junior choir, in their various songs in costume. Also solos, duets, recitations, etc.

The second part will be presented by members of the Aid. The Ladies' Aid "Mamas" make their debut. "Why do they look so scared? Come and see the answer to this question. It's enough to make a cat laugh.

Admission: Adults 50c. Children 15c. Come and have a good time. New talent and new songs.

How is Your Subscription?

New Way To Raise Grain

Wheat Crops Produced Two Years Quicker By Electric Light

Successful experiments in the use of electric light in speeding up the growth of wheat plants are being continued at the Victoria State Research Farm at Wellesboro, near Melbourne. The results are promising of practical value in wheat raising and in the introduction of varieties from other countries.

Ordinarily 10 years are required to produce new crossbred wheats, and the time of cross fertilization until distribution to the farmer. By including the plants in a cage suitably illuminated with electric light it is possible to grow the first three generations of plants in one year, and thus reduce the total time by two years.

Sometimes late varieties possess qualities, such as early ripening or grain, which it is desirable to introduce into early varieties. These two types will not flower at the same time, it is not often possible, without artificial aid, to cross them. The use of electric light at a suitable time makes it possible to hasten the development of the late type sufficiently to allow the cross to be made.

The Australian experiments were begun by Professor Wadham in 1920 as a result of observations on the growth of Australian varieties of wheat in England, and of the varieties introduced to Australia. The Australian varieties in England, Professor Wadham noticed, produced very short, pale shoots with early heads. On the other hand, English varieties in Australia remained immature and green until late in the season, and were thus adversely affected by the hot winds in November and December.

Experiments showed that the period of light which the plant received daily had an important effect on its development. By increasing the daily "daylight" period with weak electric light, it was found, the maturity could be hastened. Similarly, by inducing the plants to be in a specially constructed box, limiting the period of daylight, the growth could be retarded.

In Aid Of The Blind

Conference May Be Held In Ottawa In June

An inter-provincial conference, in the interests of Canada's 8,000 sightless citizens, will probably be held in Ottawa during June, according to John A. Conley, chairman of a newly named Saskatchewan advisory committee of the Canadian Federation of the Blind. The conference will seek federal government action on a move for pensions.

"We are trying to get each provincial government to memorialize Ottawa in favor of pensions for the blind," Mr. Conley said.

"Provincial governments could take such action at sessions in February and March and there would be time to appeal to the federal government before the session at Ottawa closes. If we met at Ottawa in June we could go to the government then."

"Our convention in Regina has helped our organization a great deal. We hope to make good progress as a result of such meetings as these."

Couldn't Fool Him

"Good morning, Mr. Hardy," said the vicar. "I haven't seen you at church lately. How is it?"

"I don't come to church to be insulted."

"Whatever do you mean?"

"Last time I came to church I was a bit late, and while I was waiting in the porch I heard you call me a fool."

"Yes, you did. I distinctly heard you say, 'There is no fool like the foolhardy.'"

So far as the New Year's honors are concerned, Canada is without a peer.

Potatoes are an abundant source of the important Vitamin "C" which prevents scurvy.

Prison Governor: "Any complaints?"

Convict: "No, but I would like a curtain for that little window in my door."—Dorchester, Berke.

W. N. R. 1927

Many Kinds Of Honey

Buying the Best Is Not As Simple As It Seems

"Honey," the housekeeper says to her grocer, "honey, in a pint pot." Then she crosses it off her shopping list with a cool satisfaction, a feeling of duty done.

But honey is not so simple as all that. For instance, English honey, gathered by industrious bees from the roses and honeysuckle and harkness and Canterbury bells of 100 Victorian gardens, must always be more delicate, yet less full in flavor, than a Jamaica honey, gathered from who knows what riot of colored purple and wax-white tropical blossoms.

And that is only the beginning of the diversity of honeys one may eat.

If the "honey" column of a high-class grocer's list is examined, one will find that it is not a list at all, but a poem, a song murmured to a tune as sweet as honeydew.

There is first and foremost orange-blossom honey from Sicily—surely that should figure as a brand brand. Then, clover honey and lavender honey—what a cool, Old World sweetness must be there. Wild acacia honey and wild thyme honey—these were the "honey wild" manna which with which the Jews were supplied their knight-at-arms? Sardinian honey from France and sage honey from California—these should have the flavor of herbs about them.

Scottish heather honey—one can smell the moors as one reads the name, and feel the tang of moor air on one's cheek. Australian wattle honey—how many of the fluffy gold spikes must the bees have robbed to make a jar of this? Honey of Greece from fragrant Hyettina, honey from the lake of Hydra, in the heart of the Aegean.

The honey stands demurely on the shelf in small china jars, whose blue, orange, yellow and green and cyclamen labels are brighter than the flowers from which the honey came. Each jar holds fragrance — and freedom.

Each jar will render faithfully and knowledgeably pass by, still saying, "Honey, please, in a pint jar." Will you be content to lose the adventure of tasting each subtly different sweetness? Will she be content to walk out of the shop with just an ordinary jar of honey, leaving a dream behind her on the shelf?

The Age We Live In

Wishes To Attend To The Needs of the Elderly

"Mr. J. Moore's definition of 'depression'—'A period during which people are not under the things their parents never had'—is a good one. The implied reproach is hardly fair. The trouble is that you cannot turn the wheel of time backwards. An individual, for example, who has his motorcar, or give up his telephone, or refuse to go to the cinema, but who is in the prime of age of the motorcar and the telephone and the cinema. Somehow these things are forced upon us by the movement of events; they are part of an inevitable growth, and to check them would be like stopping a river in its course."

The "pension" is a combination of photo-electric cells and galvanic muscles, hooked up with balanced beams of light. It writes with a pen on paper all the things "seen" by the photo electric eyes.

New Automation

Photo-Electric Penman Writes With a Pen On Paper

Another robot, this time the photo-electric "penman," was described to the annual meeting of the American Institute of Electrical Engineers in New York.

This new automation is a brother of the now well established "electric eye." It was designed to keep pace with the almost lightning fast speed of the "eye," which hitherto has been able to "see" things faster than engineering devices could record them all.

The "penman" is a combination of photo-electric cells and galvanic muscles, hooked up with balanced beams of light.

It writes with a pen on paper all the things "seen" by the photo electric eyes.

Much More Than Toy

The sum of \$15,500,000 is the proposed capital outlay of the Bell Telephone Company in Canada during 1932. Yet the great investor could not prevail upon a single citizen in Bramford, Ontario, to risk a cent in what was locally regarded as an interesting toy.

If we can't say anything else of good about 1931 let's at least give it credit for its wealth.

Talking about life is dumb things most of us have seen a watch spring

Only a Superstition

Pigs Not Naturally Dirty Says Agricultural College Manager

It is a current superstition that a pig is naturally a filthy creature, but it is only a superstition. The experiment of a farm which is run by the West of Scotland Agricultural College at Auchincruive in Ayrshire is demonstration that the poor pig has been maligned in this regard. On a recent visit of a party of students they were put on the point by the spectacle of the piggy and by the accounts of the experience of those who are in charge of the department. "The cleanliness of the premises and of the animals in it astonished the visitors and their surprise was so obvious that the manager, James Cochran, took note of it. Yes, he said, there has always been a common notion that the pig is the animal least concerned about its surroundings, but this piggy demonstration that the reverse is the case."

Mr. Cochran added that the pig is so far from being dirty, it is the only domestic animal possessing naturally clean instincts. You have to train even a cat or a dog to be clean, but a pig cannot train either cattle or horses. There have been few attempts to give even a cat or a dog to be clean, but a pig cannot train either cattle or horses. There have been few attempts to give even a cat or a dog to be clean, but a pig cannot train either cattle or horses.

Here, he concluded we are providing the conditions that reveal the pig in his true inclinations, which are those of a clean animal. On a scale of animal life, the piggy at Auchincruive is such a model of its kind that its plans are being copied by many other experimental farms.

Everyone Should Use Milk

High in Calcium It Is Necessary For Good Teeth

"That good teeth have a direct relation to good health and that defective teeth may lead to serious illness are two well-established facts. Medical authorities are stressing today more than ever before, the importance of building strong teeth and maintaining them in good condition by eating the proper foods, by keeping them thoroughly cleaned, and by having them examined periodically by the dentist."

The minerals necessary for good teeth are, fortunately, supplied in our most common and abundant foods. Milk, high in calcium, stands first as the chief tooth builder, and it is of vital importance that the diet of both children and adults should include a sufficient amount of this food to supply the calcium required, says a circular from the Department of Agriculture, Ottawa. There will be no danger of a deficiency if milk is served as a beverage, particularly for children, and generously used in the making of cream soups, creamed meats and vegetable dishes, and milk desserts.

Good For The Money

Father criticized the sermon, mother disliked the blunders of the organist, and the eldest daughter thought the choir's singing atrocious.

The subject had to be dropped when the small boy of the family, with the choirboy's love of fair play, clipped in with the remark: "Dad, I think it was a jolly good show for a penny."

"It's the old boat" to dad and "the bus" to the children, but it's always "the car" to mother.

Final Crop Estimate

Wheat Crop Of Canada For 1931 Now Estimated At 804,144,000 Bushels

Aggregate value of all field crops in Canada in 1931 is estimated at \$425,065,100 as compared with \$465,000,000 in 1930, the Dominion Bureau of Statistics reported recently. The report is the final estimate of the area, yield and value of all crops in the Dominion for the past crop season.

The wheat crop of Canada, in 1931 now estimated at 804,144,000 bushels as compared with a revised figure of 470,672,000 bushels for the crop of the previous year. The new estimate for 1931 represents a slight increase of about six million bushels over the provisional estimate of November 12. Increases occur in Ontario, Saskatchewan and Alberta, with the estimates for the other provinces practically unchanged.

Total area under field crops in 1931 is estimated at 57,964,000 acres as compared with 64,511,670 acres the previous year, with an aggregate value of \$622,490,000. There was a decline of 4,500,000 acres in the area devoted to field crops in 1931 as compared with 1930, the decrease being equally divided among Quebec, Ontario, Manitoba and Saskatchewan.

Order Has Increased

French People Are Developing Taste For Canadian Apples

We are delighted to know that our friends in France are developing a taste for Canadian apples. Ottawa announces that automatic "cotton-line" machines will be used in the ports for vending this appetizing fruit. One of the largest fruit-importing houses in the Republic has placed an initial order for 10 carloads of apples, valued at \$18,000, and contemplates handling Canadian apples exclusively in the future. Public auctions will be held, in addition to the installation of two thousand of the vending machines already mentioned. It is good to know that Canada is finding new trade opportunities abroad. Of the crop of 1930, we learn, only 2,415 barrels were sent to France, while last year this figure climbed to 25,251.

Does Not Deserve Sympathy

Public Opinion Becoming Stronger Against Drunken Drivers

"Liquor is nowhere so much out of place as in the persons of men and women in charge of a motor car. Public opinion in this country is becoming more severe against the individual who endangers the lives of others by taking the wheel of a car while under the influence of liquor. And rightly so. The driver who injures or takes the life of another person as a result of an accident for which intoxication was responsible is entitled to no sympathy and no leniency."

Minor For British Explorer

The Culham geographical medal, one of the highest honors conferred in the United States in recognition of the explorer's geographical discovery, was awarded to Herman Thomas, British explorer, who last winter made the first recorded crossing of the great southern desert of Arabia.

"Henry, do you love me still?" "Yes—better than any other way."

Noxious Weed Problem

Southeastern Manitoba Reported To Be Most Heavily Infested

Southeastern Manitoba is almost heavily infested with noxious weeds of the Canadian prairies while the Peace River district suffers by far the lightest infestation, according to a report presented at the annual conference at Edmonton, of the Associated Weed Committees of the National Research Council, by J. M. Mason, special investigator for the council.

Mr. Mason recently completed an exhaustive weed survey for the research council. This report showed that weed infestation was governed to a large extent by the moisture and type of soil. Irrigation districts and areas around lakes suffered severely. Last year southern Saskatchewan was fouled almost too dry for even weeds, but, relatively speaking, infestation was worse because practically no alfalfa and weeds grew there this year.

An interesting experiment proving the value of better farming methods was reported by Dr. L. R. Kirk, formerly of the University of Saskatchewan, now agronomist for the Federal Department of Agriculture.

The Federal Department acquired a section and a half farm overgrown with weeds in the dry district of Saskatchewan, near Lakewood, where the better farming methods were applied, with the result that last year, while most of the neighboring farmers were being fed on their alfalfa farms, now rid of three-quarters of its weeds, produced several thousand bushels of good grain, sweet clover and seed potatoes.

Taking Place Of Horse

Trucks and Tractors Making Astonishing Little Use

The rapid progress of the truck and tractor in taking the place of the horse is the number of horses in the last decade. Ten years ago there were 3,610,484 horses in Canada, while at the end of that period there were 3,235,000, showing a decrease of 375,484, or more than 30,000 year. At the beginning of the decade there were about 55,500 trucks in Canada, as compared with a total of 165,484 at the end of that time. At the beginning of the decade there were 465,278 cars, or one for every 10 persons in the Dominion, while the latest figure available gives a total of 1,239,889, or seven persons to each car.

This Speedy Age

Airplanes Can Travel Over 24,735 Feet Per Minute

Airplanes can travel at speeds above 300 miles an hour, automobiles at over 200 miles an hour, speed boats at better than 100 miles an hour, human beings, horses and dogs at lesser speeds. Translated into feet per minute, airplanes can travel more than 24,735 feet per minute, automobiles better than 17,600, and speed boats better than 8,500 feet per minute. Olden that then one hears reports in elevators of new buildings that the elevator covers more than 1,000 feet a minute, which when translated into miles per hour is somewhat less than 12.

In the average London residence one ton of water is being used every day.

The only difference between repairs and impudence is the size of the man who says it.

First Rule Of The Road

Be Absolutely Sure Your Brakes Are In Working Order

A giant locomotive hurried majestically out of the railway round-house the other morning prepared to be brought to a halt by a sudden stop at a journey across several states. In the cab sat a veteran engineer watching carefully the performance of his son, a young man just beginning his service as a master of the speeding wheels and rods. Suddenly the grided engine "snatched out his hand as the engine gathered speed and applied the mechanical power controlling the brakes. The locomotive instantly slackened its speed. The son looked quizzically at his father, failing to understand the reason for his action.

"Before you start out on a run be absolutely sure your brakes are in good working order," admonished the veteran engineer with a smile. That's one of the first rules of the road—and it is sure to prevent things going wrong in time of emergency."

Similar standards of practice could be applied with profit to another form of transportation, the automobile. "Be sure your brakes are in good working order," admonished the veteran engineer with a smile. That's one of the first rules of the road—and it is sure to prevent things going wrong in time of emergency."

Statistics recently gathered indicate that one of the chief causes for automobile smash-ups is defective brakes. One way to do away with a large number of fast motor travel is for every driver occasionally to test the gripping power of his brakes. Periodically, when he leaves the garage. And, of course the motorist who always knows his brakes are in good working order should "test" his brakes to see if they are "self-cleaning" the road until they are fixed.—Christian Science Monitor.

The Port Of Moonshine

Flourishing Port On James Bay Was Formerly Moose Harbor

Pages a new name on the map of Ontario—"Moonshine." It is on James Bay. Only a few years ago it could only be reached by the Hudson's Bay Company, which has anything of a place at all, it was known as Moose Harbor. Eleven years ago a party of American geologists came down there, and there was the state of civilization that eleven days elapsed ere news of their safety reached the outer world by means of Indian runners.

If those men landed there today they could step into a Pullman car of the Transcanadian and Northern Ontario Railway and eighteen hours later find themselves back in New York.

The new port will add to the growing prosperity of this district and railway. Moonshine will be a grain and ore port. There is an immense area of unexplored territory in the neighborhood, known to contain hematite deposits. A little to the south is a lignite field where preliminary drilling has revealed the presence of 100,000,000 tons of soft coal. A huge oil industry is in prospect up there.

The James Bay area, not long ago considered a wild and uninhabitable place, may soon become one of the most prosperous shipping and industrial parts of Canada.—St. Thomas Times-Journal.

Diamond Mines In Canada

Locked in the wilderness of Canada's far north is "an innumerable rich source of diamonds," according to Dr. Sidney H. Ball, of New York, gem specialist and consulting mining engineer. Addressing the Royal Canadian Institute at Toronto, Dr. Ball asserted the Dominion might hold a potential diamond mine to rank amongst the foremost of the world.

Some 80 species of coffee plant exist, but only a few are commercially grown.

A vain woman and a drunkard are never satisfied with a moderate use of the glass.

"Do you think your family will accept me as your husband?" "Don't worry, I'll try to find my strange habits."—Esquima, Barcelona.

WORLD HAPPENINGS BRIEFLY TOLD

Imports of rice into Japan this season may total 30,000,000 bushels. British Columbia fruit growers intend to make more B.C. fruit claimed by considered in the arrangement for British preference.

The Province of Ontario's \$5,000,000 issue of three-year bonds was oversubscribed on the initial day of offering.

Capt. J. P. Baul, who crossed the Atlantic with Kingsford-Smith in 1930, is planning a flight to New York and back next May.

The Prince of Wales announces the establishment of a scholarship for Argentina students at Oxford University.

H. G. Watkins, youthful leader of last year's Newfoundland exploration party, will head an Antarctic expedition in the fall.

James P. Manion, son of Hon. R. J. Manion, Minister of Railways and Canada, has been appointed assistant Canadian Trade Commissioner at London.

The London Sunday Express said negotiations would soon be concluded for the opening of direct telephone connection between Great Britain and Canada via London and Halifax.

Dr. Wellington Koo, former Chinese Foreign Minister, will be his country's representative on the Manchuria commission of the League of Nations Council.

D. C. Harvey, Nova Scotia architect, has uncovered a divorce dated May 15, 1930, between William Williams a British officer and his wife, and believes it to be the first on this continent.

The Fort of Churchill will be open for commerce this summer, Hon. Dr. R. J. Manion, Minister of Railways and Canada, states. "We will be in a position to handle any commerce offered," the Minister added.

Lower Construction Costs

Approximately Eleven Million Dollars Saved in Canada Last Year

Approximately \$11,000,000 was saved in Canada last year in the cost of construction of dwellings and other buildings, in 61 cities, by the reduced cost of materials, the department of trade and commerce reports in a statistical review. This amount represents roughly one-fifth of the reduction in the total value of building permits issued during the year as compared with 1930.

A report shows that the aggregate value of building permits in 31 cities last year was \$138,000,000, a reduction of \$55,000,000 from 1930. The index of prices of building materials dropped 50 per cent. during the year. Compared, however, with 1929 figures for 1930, the peak post war inflation period, the cost of building materials has dropped by nearly 40 per cent. while the total value of permits issued was only down five per cent.

Detailed figures from 50 of the 61 cities show that permits were issued during the year for the construction of over 30,000 dwellings and 25,000 other buildings.

Golden Wedding Anniversary

Prince of Wales Sends Congratulations To Agnes Comedian

The Prince of Wales, among many hundreds who sent congratulations recently to the genial old time comedian Charles Coburn and his wife, who celebrated their golden wedding anniversary in London, England.

Coburn, now nearly 80 years of age, reached the pinnacle of movie hall fame with the song "The Man Who Broke the Bank at Monte Carlo" almost his earlier "Two Lovely Black Eyes" was almost as great a classic of his kind.

Higher Taxation

Financial Institutions in Saskatchewan To Receive Greater Share Of Revenue

Such Saskatchewan financial institutions as banks, trust, loan and mortgage companies, are going to contribute a greater share than they do now to the revenue of the province. It was officially learned.

From such sources, under the provisions of the Corporations Taxation Act, Saskatchewan is now deriving a revenue of slightly more than \$400,000, a large percentage coming from insurance companies.

To the effort to balance the budget by increasing revenues and reducing some forms of public services, the government proposes to make amendments to the Corporations Taxation Act with a view of bringing the revenue from that source to upwards of \$800,000, the banks to pay a fair share of the 100 per cent. increase.

"Fool's Gold" Not Worthless

Eryite Is Very Important Material For Commercial Use

Eryite, which, owing to its yellow color, has so frequently been mistaken for gold as to earn the name of "fool's gold," actually is not the worthless material that the name implies, but has many important commercial uses. It is employed in the manufacture of sulphuric acid, and sulphuric wood pulp, and in smelters it is used as a fluxing agent to furnish iron for the slag. It is also used to some extent in rubber and jewelry. The largest pyrite deposits are in Spain and Portugal.

VARIEITY IN JACKETS-LIKE DRESSES IS UNENDING

Don't you love this model, so distinctly individual?

It has the wrappings bodice designed, so youthfully slimming.

And it combines the two smartest colours—black and vivid—red supple colours.

It's a charming dress to wear beneath the fur coat. It carries with it a rather sporty air. And a dress that a little later, can be worn for nearly every smartly without a top coat.

You can also make it as a complete dress. Its delightful lively to supple blue-canton-fabric is available in 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches.

Wool jersey, velvet and many rayon novelties are also available.

Price of pattern 25 cents in stamps or coin (check is preferred). Wrap coin carefully.

IT'S AN OLD SCOTTISH CUSTOM

"Why did ye sit up like that, father?" "Well, if yer lucky, ye get things given tau ye, and it also rests the feet!"—The Peasant Show, London, England.

Recipes For This Week

(By Betty Barclay)

ECONOMICAL CHICKEN SALAD

(Without Chicken)

- 2 cups cold roast pork, diced.
- 1 1/2 cups celery, finely cut.
- 1/2 cup dill pickle, chopped.
- 1 teaspoon salt.
- 1/2 teaspoon paprika.
- Mayonnaise.

Letuce.

Combine pork, celery and pickle. Add seasonings and sufficient mayonnaise to moisten. Serve on crisp lettuce. Garnish with additional mayonnaise.

MINIKEN JELLY ROLLS

(4 eggs)

- 1/2 cup special cake flour, sifted.
- 1/2 teaspoon baking powder.
- 1/2 teaspoon salt.
- 4 eggs.
- 1/2 cup sifted sugar.
- 1 teaspoon vanilla.
- 1 cup cold current jelly.

Sift flour once and measure. Combine baking powder, salt, and eggs in bowl. Place over smaller bowl of hot water and beat with rotary egg beater, adding sugar gradually until mixture becomes thick and light-colored. Remove bowl from over hot water. Fold in flour and vanilla. Pour into two pans, 15x10 inches, lined with greased paper, and bake in hot oven (400 degrees Fahrenheit) 10 minutes. Turn from pans at once onto cloth covered with confectioners' sugar. Remove paper. Quickly cut off crisp edges of cake, cut each cake into six pieces of equal size, spread with jelly, and roll. Wrap in cloth and cool on rack. Before serving, decorate rolls with roses and borders of sweetened whipped cream forced through pastry tube. Makes 12 rolls.

An Important Event

But First Railway Train To Cross Africa Did Not Thrill World

The first railway train to cross Africa from ocean to ocean started July 1, this year, on the journey from Lobito Bay, to Beira, a distance of 2,949 miles. The event was a vastly important one, and the engineering achievement was worthy of note, but it was calmly accepted by the world. Yet when David Livingstone, the first white man to cross Africa, made the journey in two years, there was hardly anyone throughout all the world who didn't thrill to his grand adventure, and hardly a home where it was not a topic of burning interest.

Women Granted Homesteads

Alberta women are steadily taking advantage of the new provincial ruling that women may now file on homesteads. A report issued by the Lands Department recently showed that in October out of a total of 368 homesteads filed upon in Alberta, 174 applications for these free lands were made by women.

"What are you doing there?"

"The doctor recommended me sunbath, and so I have left the tub in the sun all day and now I am having my bath!"—Peggy Gales, Yverdon.

Exhaustive Tour

Canada Has Arranged For Reconnaitre Tour Of Ceylon and India

Public interest in India and Ceylon has become intensified in recent months, an interest which finds expression in an unusual, "reconnaissance" tour of Ceylon and India just arranged by the Canadian Line in collaboration with the American Express Company. Following the price trends of the day, the cost will be kept down to a minimum. This is said to be the first time that such an exhaustive tour of India has become possible at popular prices.

The tour leaves New York on March 15 on the "Aquitania." The "Aquitania" will sail direct to the Mediterranean on what will be her second cruise this winter to those waters. The party will call at Gibraltar, visiting the Fortifications, Trafalgar Cemetery, and other points of interest in the British Fortress. The following day a call at Algiers will enable the tour party to explore the city thoroughly and to see parts of Algeria. Crossing the Mediterranean again, the "Aquitania" will arrive at Nice on the 14th, two days will be spent along the Riviera, the party proceeding by motor coach to Marseilles.

Here the Ceylon and India party will embark on the S.S. Marmora, 17,000-ton P. & O. liner, formerly carrying first and second class and now converted to accommodate only tourist class.

Colombo is reached on the 2nd of April and the most interesting parts of Ceylon will be visited during the three days spent there. The party then proceed on their Indian tour, arriving at Madras on the 8th and after visiting the city proceeding by express to Calcutta. After two days in the former Indian capital, the party proceed by mountain railway to Darjeeling, 7,500 feet high in the Himalayas. The usual trip will be made to view the sunrise over Mount Everest and the Himalayas. After returning to Calcutta the party leaves for Benares, one of the world's oldest cities, thence to Agra where a visit will be made to the Taj Mahal, the Fort and the Palaces. There will also be a visit to the deserted city of Patanagar Biki, returning via Agra's Tomb at Sikandra. Three days will be spent in Delhi, then returning to the Colossal Caves of Elephanta and the Towers of Silence, strange burial places of the Parsees.

For the return journey the tour party will sail from Bombay on the new P. & O. liner "Strathgairn," 22,000-ton gross, calling at Madras. London is reached on May 20th where the party disembark and go by boat-train to Southampton to meet the Canadian "Mauretania" which will be back for New York on May 21st arriving in America on the 27th.

The recent political and social developments in India are expected to attract a large number of Americans and Canadians to this unique and exhaustive tour of Ceylon and India.

Like Early Easter

This year Good Friday falls on the 26th of March, and Easter will be here on the 27th of March. Those farmers who think there is good fortune in store for the man who begins his seeding on Easter Monday may have a muddy or a snowy seeding this year. Even tobacco planters like to see an early Easter. To them it seems to mean quick retreat of the Frost King's treacherous forces.

Scotland is to have a country-wide temperance campaign in 1935.

Mary had a little lamb. What will you have?

Few Of Them Left

Canada's Little Band Of Knighted Gentlemen Growing Less

The death of Sir George Porter reminds us again that time inevitably is drawing closer the ranks of Canada's little band of knighted gentlemen. In the benches of the Senate and the House of Commons titles used to be more common, perhaps, than the qualities of statesmanship. Now in the Upper House is left only Sir Allan Aikman, and in the House of Commons Sir George Porter and Sir Eugene Flack keep him company; and of the three only Sir George Porter is really active in the public life of the Dominion.

Outside Parliament as well the knights who were politicians are becoming rare under our democratic skies. Sir Thomas White is immersed in private affairs; Sir Henry Drayton runs the Ontario Liquor Control Commission; Sir William Mulock, full of years and honors, does his day's work on the Ontario Bench; Sir Robert Borden enjoys the autumn of his days in peace and privacy.

The majority of our remaining knights are outside the ranks of politicians—business men, artists, educators. Seven of them are still living with Sir Arthur Currie; one of them—Sir Robert Falconer—is an experienced statesman; the remainder of them are either judges or bankers.

Five bankers remain: Altholston, Boscawen, Greenwood, Shalton, Strathmore. None of these, three permanently in England.

A few decades more, and Canada, we suppose, will be knightless. One may be permitted to wonder whether the consequence will be that more vigorous democracy which our Parliament foresees some thirteen years ago. We should like to think so, but the world, alas, isn't as simple as that—Ottawa Journal.

Manitoba's Grain Acreage

Estimate For This Year Shows Substantial Increase

With an increase of 1,016,500 acres compared to the previous year, the Manitoba acreage for grain in 1932 is estimated at 5,773,000 acres.

The increases are in minimum fall, 222,000 acres, and fall ploughing, 585,000, according to the provincial department of agriculture. According to the figures gathered, 65,000 acres were broken last year; there were 1,870,000 acres under summer fallow and 3,288,000 acres of fall ploughing.

Arrived Two Late

A policeman was standing guard over the house where the tragedy had occurred, when a young man tried to enter, but was pushed back. "Look here," he said indignantly, "I am a journalist, and I—er—murder." "No, did you say?" roared the policeman. "Well, you're too bloomin' late—'s dead."

The man who said that property was ahead is still quite right.
